

Liquid mineral fertilizer
NPK 10-5-5 + ME
for ornamental plants that form green leafy mass

APPLICATION OF THE FERTILIZER

Liquid mineral fertilizer to be applied through the micro irrigation system (drip irrigation and micro rain), watering and foliar application.

USE AND EFFECTS

NPK 10-5-5 + ME is a fertilizer applied to ornamental plants that form green leafy mass above all, which can, in smaller quantities, be applied to flowering types as well. It can be applied to ornamental plants and indoor, balcony and outdoor flowers.

NPK 10-5-5 + ME contains three main macronutrition elements, nitrogen, phosphorous and potassium, in addition to other nutrients as well (Cu, Mn and Zn). Use of NPK 10-5-5 + ME provides proper growth, development and formation of green leafy mass for ornamental plants.

MANNER OF APPLICATION

Watering (solution of water and fertilizer), drip irrigation and foliar application:

- once a week, during the growth and development of plant;
- once a month during the plant rests.

0.3 % is the concentration recommended through watering and drip irrigation (1 cap of the fertilizer with 2 l water or 1 l of the fertilizer with 330 l water), whereas concentrations of 0.2 % (1 cap of the fertilizer with 3 l water or 1 l fertilizer with 500 l water) are recommended through foliar application.

NOTE

NPK 10-5-5 + ME can be used combined with pesticides. Before each use, read the instructions from the manufacturer of protective gear. The order of dissolving is as follows: water - NPK 10-5-5 + ME - pesticides.

STORAGE

Store at a temperature higher than +10°C.

SHELF LIFE

5 years.

COMPOSITION	
Total nitrogen (N)	(10.0 ± 0.7) %
Phosphorus (P ₂ O ₅)	(5.0 ± 0.5) %
Potassium (K ₂ O)	(5.0 ± 0.5) %
Microelements in chelate form	
Cu, Mn, Zn
